

MForesight National Summit
“America’s New Manufacturing Moment”
September 29, 2016

Speaker Biography: Christine M. Furstoss

Christine M. Furstoss, Global Technology Director for Manufacturing and Materials Technologies at GE, is responsible for working with leadership and research and development teams across GE, and with strategic partners, to assess, set strategy for growth and implement critical process and material developments for industry-leading products and manufacturing. In addition, Furstoss leads approximately 450 researchers across North America, Europe and Asia. She has worked in numerous divisions of GE Power & Water.

Furstoss joined GE in 1989 in the Materials and Processes Engineering Department of GE Energy. She received her bachelor’s and master’s degrees in materials engineering from Rensselaer Polytechnic Institute.
