“America’s New Manufacturing Moment”
September 29, 2016

Speaker Biography: Perry Wyatt

Perry Wyatt is responsible for leading product development and engineering of advanced batteries for Johnson Controls. In this role, he oversees the global development and deployment of lithium-ion batteries for automobiles and stationary energy storage applications. Prior to joining Johnson Controls, Perry led product development for a battery start-up seeking to establish U.S. based manufacturing encompassing over 10 years of focus on advanced battery technologies. Additionally, he developed a perspective of design for manufacturing as a member of the microprocessor teams at Hewlett-Packard and Intel Corp.

Perry holds a Bachelors in Electrical Engineering from California Polytechnic, San Luis Obispo and a Master of Business Administration from The Fuqua School of Business, Duke University.
